

KEM SEALER PAV

Masonry and concrete block sealer

Ref. WP/CO-V1-0612

Description

KEM Sealer PAV is a colourless coating, which is quick drying. It penetrates into the pores of the substrate under treatment to bind the particles together in tough resilient, abrasion-resistant enamel. It provides a protective barrier on porous surfaces, which resists chemical.

Uses

KEM Sealer PAV is used as a waterproofing coating for concrete, brickwork, masonry, rendered and plastered walls, and cement painted surfaces.

Advantages

Waterproofing : Prevention of water borne dirt and atmospheric grime adhering to porous surfaces

Asbestos-Cement Sheet : Penetrates to create hard surface topping which prevents moisture penetration, binds together fibers and prevents build-up of grime deposits. Ideal base for subsequent decoration.

Chalking Surfaces : Have highly penetrative qualities and binds together friable surfaces. Provides sound base for subsequent application of decorating materials.

New Concrete : One coat forms a moisture barrier film on new concrete, which retards moisture loss ensuring maximum strength

Typical Properties

- Service Temperature Limits : 10⁰ C to 45⁰C
- Flash Point : > 25⁰ C
- Specific Gravity at 30⁰C : 0.85 ± 0.02
- Viscosity (Ford cup B4 at 30⁰ C): 20 ± 2 Seconds

Direction for use

Surface Preparation Ensure surfaces is clean and free from dust. Where concrete surfaces require cleaning to remove oil or grease

Packaging

25 kg. , 50 kg.

Technical Service

Chembond has established itself in various fields on the basis of its dependable technical service. For this purpose, we maintain a well equipped laboratory for research & quality assurance of all products. Our experienced personnel are always on call and would always be available for product demonstrations and product performance monitoring.
